

Eisenhower Executive Office Building

Temporary Full-Screening Facility

1650 Pennsylvania Avenue, NW
Washington, DC

Submitted by the General Services Administration

Preliminary and Final Site and Building Plans

Commission meeting date: May 2, 2013

NCPC review authority: Federal Projects in the Environs (40 U.S.C. § 8722(b)(1) and (d))

Applicant request: Preliminary and final approval of site and building plans

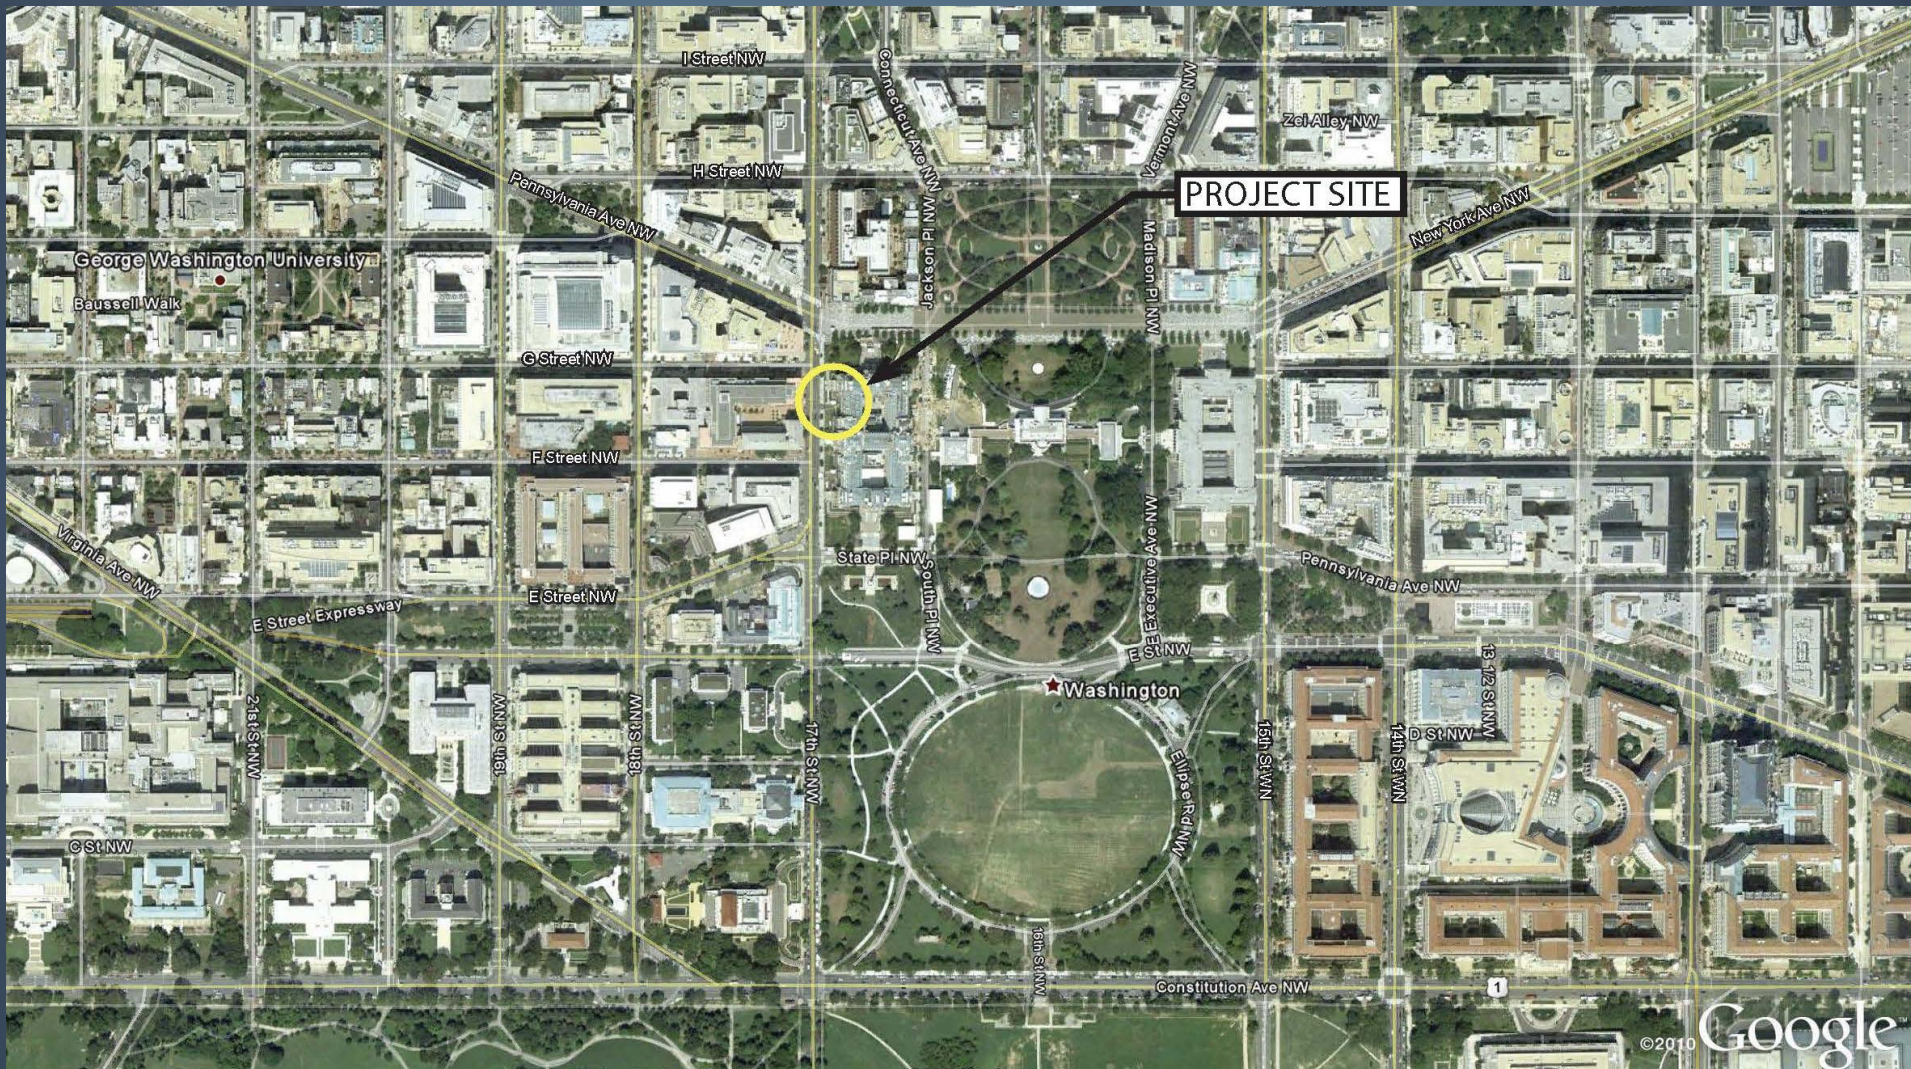

Delegated / consent / open / executive session: Delegated

NCPC Review Officer: C. Hart

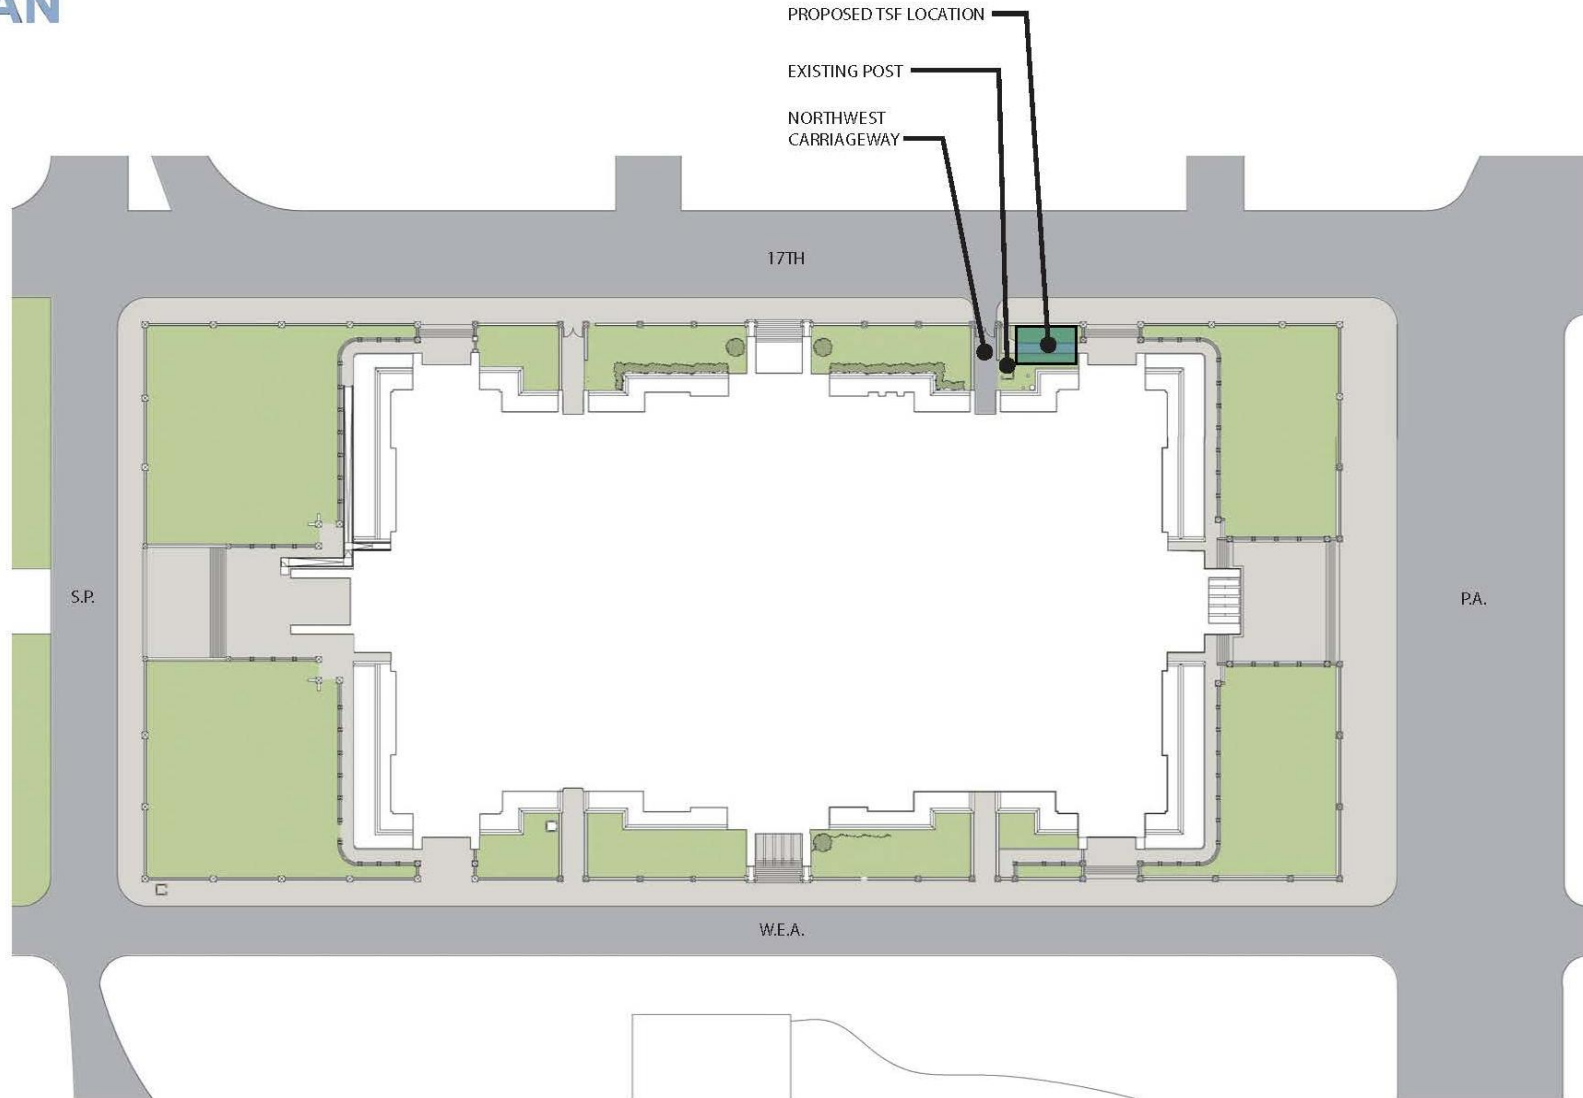

NCPC File number: 7488

Project summary:

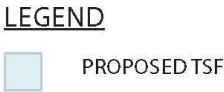

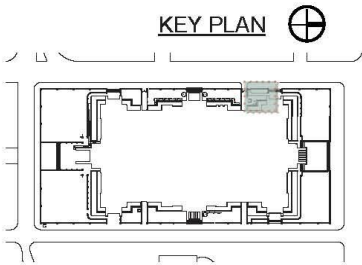

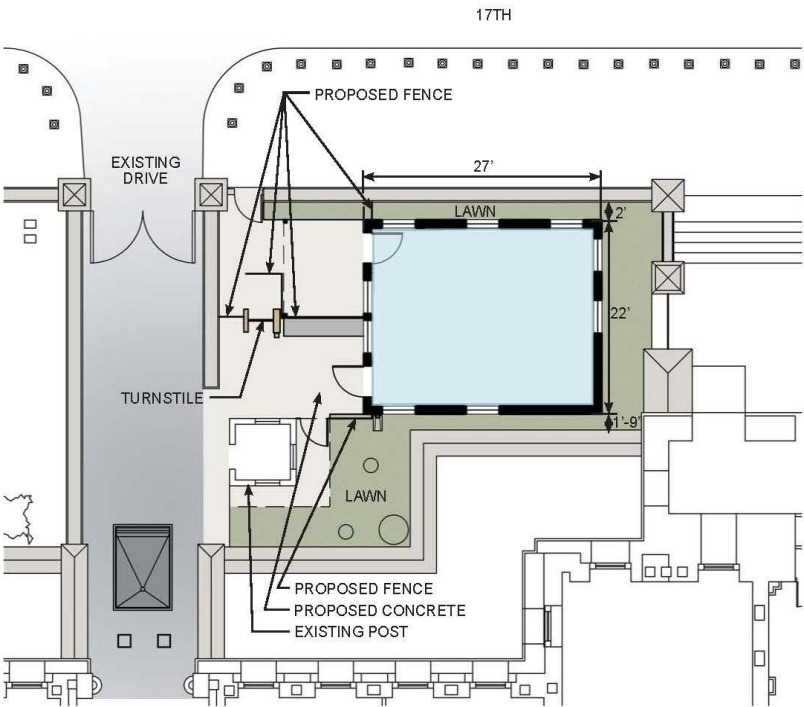

The proposed Temporary Screening Facility will serve additional security screening requirements for EEOB. The proposed building is a 675 square foot, steel frame, metal panel clad building with insulated walls and roof. The exterior finish of the building consists of metal wall panels and components in a manufacturer's standard color that will be similar to the exterior color and tone of the EEOB. The proposed foundation system is slab-on-grade concrete with perimeter footings, which allows the building to sit lower to the ground and minimizes built-up ramp and railing systems. The pathways around the proposed structure are less than a 1:20 slope and do not require any ramps or railings. The proposed building is sited just to the north of the northwest carriageway of EEOB, in the lawn area in front of the moat. The building is located 2 feet off of the existing site wall along the 17th Street sidewalk and is roughly centered in the north-south direction between the carriageway and the north pavilion.
